

LADY LUCK...CHANCE...RANDOMNESS...

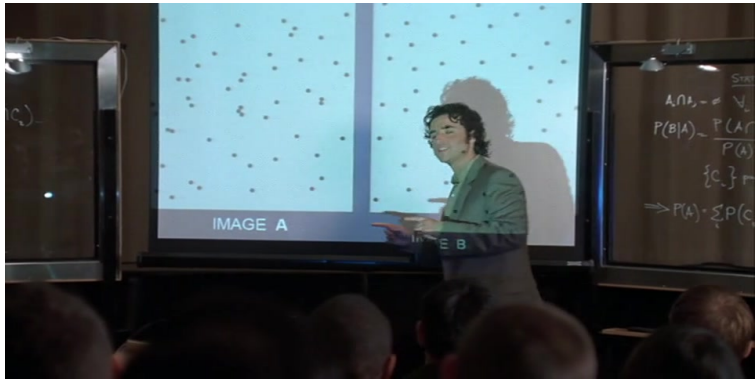

HUMAN BEINGS TRULY HAVE A HARD TIME UNDERSTANDING IT.

RAINDROPS FALL RANDOMLY.

NOW, WHICH OF THESE TWO IMAGES BEST REPRESENTS

RAINDROPS FALLING ON A SIDEWALK?

IS IT IMAGE A?

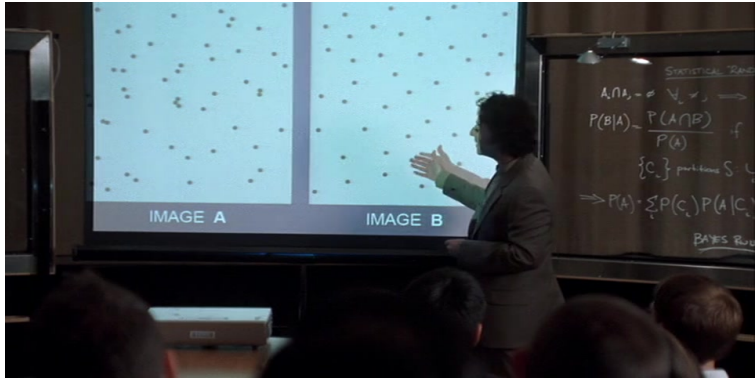

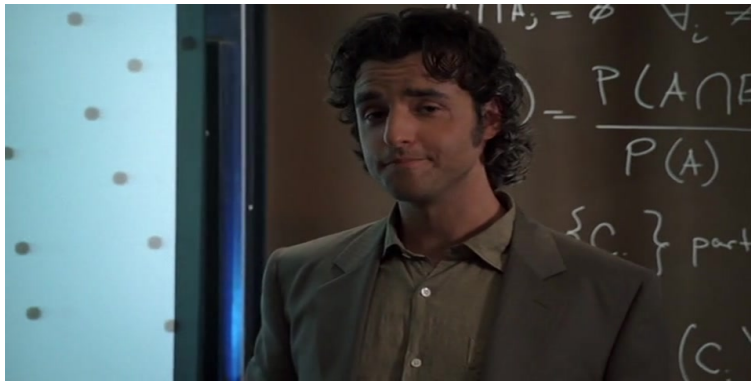

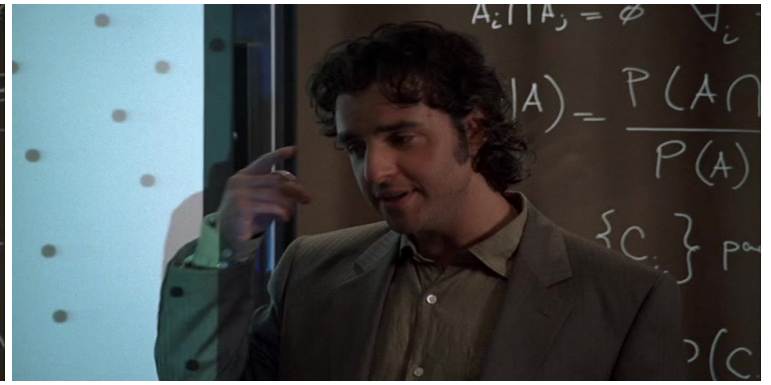

IMAGE B? OKAY.

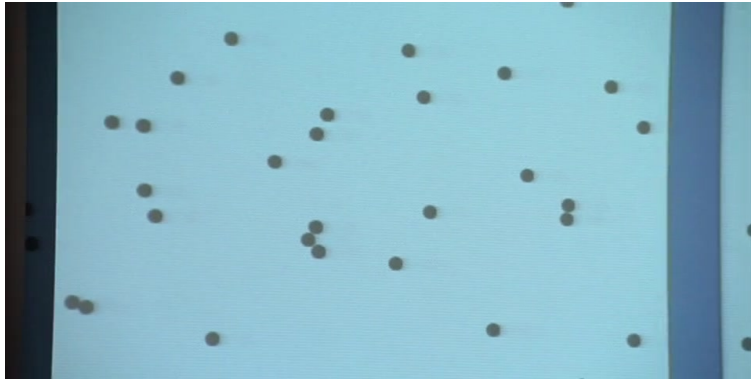

YOU'RE WRONG.

OUR BRAINS MISPERCEIVE EVENNESS AS RANDOM,

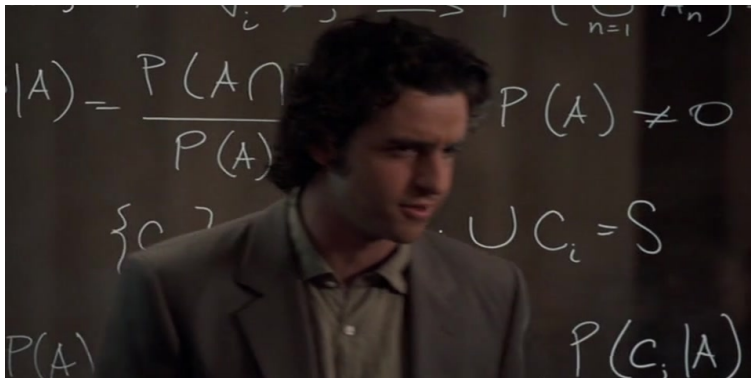

AND WRONGLY ASSUME
THAT GROUPINGS ARE DELIBERATE.

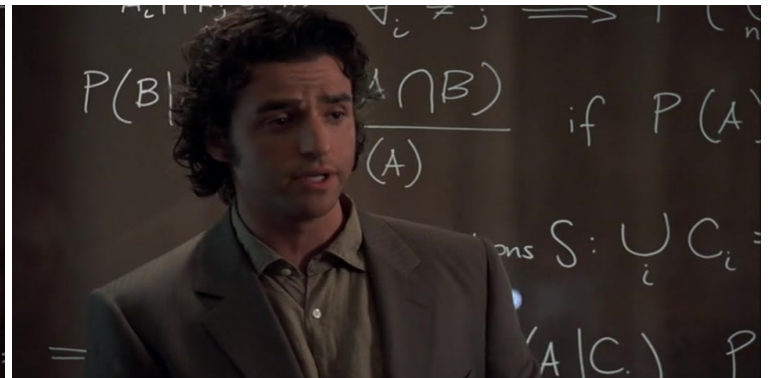

BECAUSE OF THIS,
PEOPLE MAKE ALL SORTS

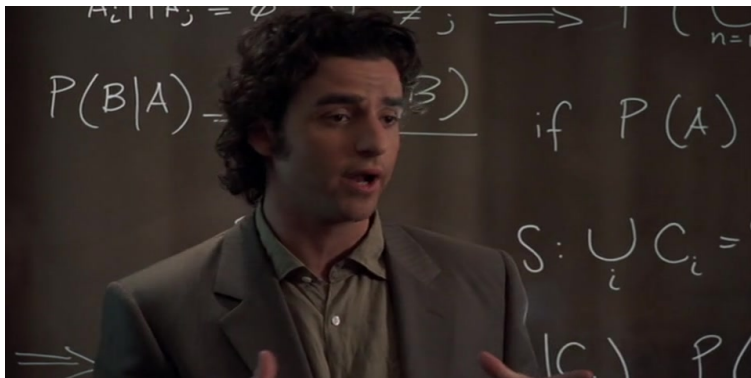

OF IRRATIONAL DECISIONS.

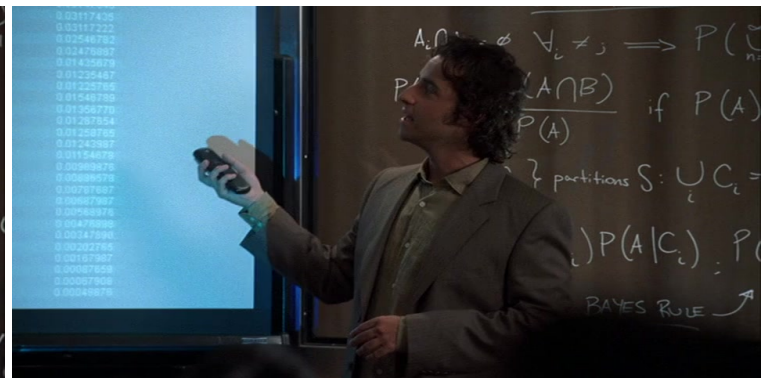

LIKE, THEY- THEY WON'T WORK
IN A HIGH-RISE BUILDING,

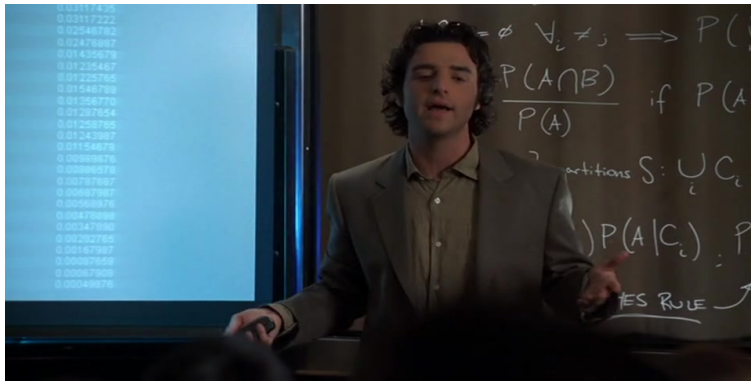

OR THEY'RE AFRAID TO LIVE
IN AN EARTHQUAKE-PRONE AREA.

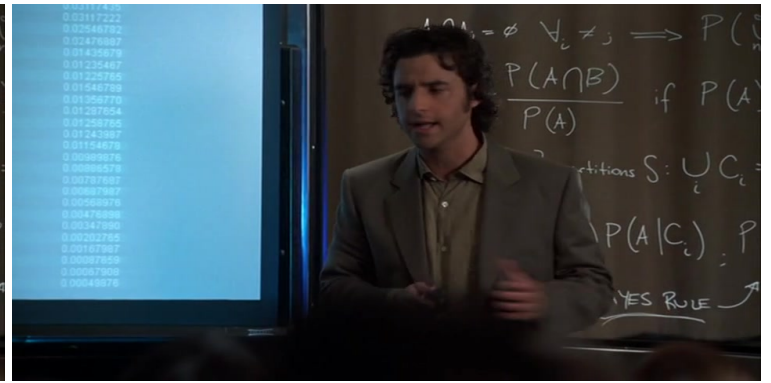

AND YET, A MATHEMATICAL
ASSESSMENT TELLS US

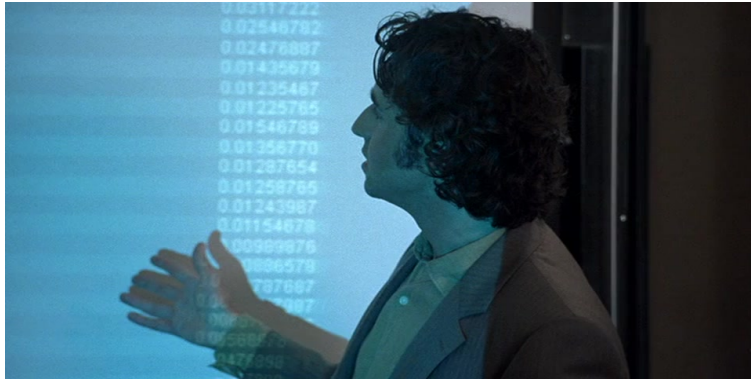

THAT YOU ARE FAR MORE LIKELY
TO SUFFOCATE IN BED

THAN YOU ARE TO DIE
IN A TERRORIST ATTACK.

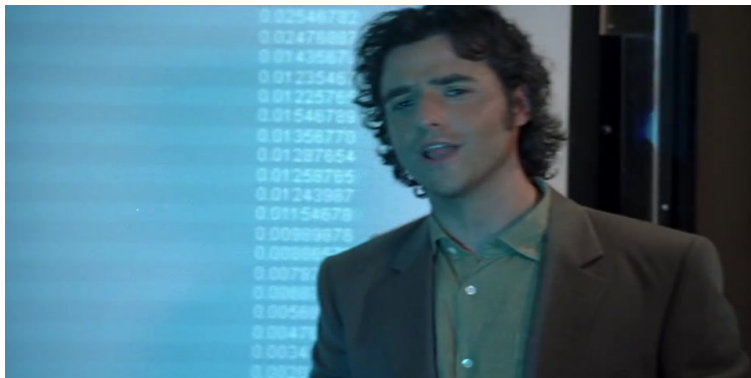

YOU ARE TEN TIMES
MORE LIKELY

TO DIE FROM ALCOHOL THAN
FROM BEING IN AN EARTHQUAKE.

AND IT IS THREE TIMES
MORE LIKELY

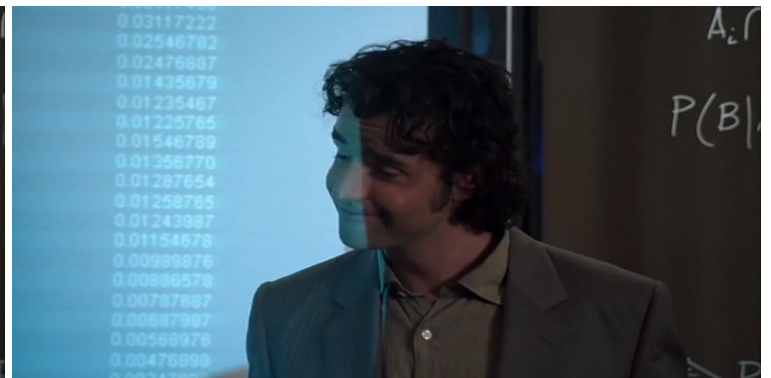

THAT YOU WILL BE KILLED
WHILE DRIVING

TO BUY A LOTTERY TICKET
THAN IT IS THAT YOU WILL...

THAT YOU WILL WIN THE LOTTERY.

(STUDENTS LAUGHING)
